ARTIST'S STATEMENT

The main interest at the centre of Salvatore Arancio's artistic practice lies in the potential of images. Particularly in how images and their meaning can be re-framed or re-viewed. Each facet of his practice contains an intertwining juxtaposition of the roots and representation of images: natural and artificial, mineral and vegetable, scientific and mythological. Departing from their literal meaning, through the use of a range of media such as ceramics, etching, collage, animation and video, Arancio creates new juxtapositions that are both beautifully evocative and deeply disquieting, aiming to create a sort of atlas of confusion.
